

## **REPORT**

The increase of plastics injection orders requires the development of production capacities for this activity. The extension of capacities is carried out by increasing the surface of the factory shed from premises C64A (inv. no. 10053) of 570 square meters.

In order to carry out these works, the following stages must be achieved:

1. subdivision of lot 28, of 158 square meters,
2. subdivision and purchase of lot EMGS, of 182 square meters;
3. joining lot 10 (on which C64A is located) with lot 11, lot 12, 158 square meters from lot 28, 182 square meters from lot EMGS;
4. beginning of actions for obtaining the building permit for: COPR C64A EXTENSION;
5. erection of the building and adjacent installation works.

Please approve the purchase of the land of 182 square meters from S.C. Electromagnetica Gold Star S.R.L. (EMGS) and C64A shed extension with a new building of 570 square meters.

Mentions:

- the investment program for 2017 engages the payment of a significant amount for the extension of the plastics production by building the factory shed and purchasing injection machines.
